

FOLEO SMART SOFTENER

COMMERCIAL PRESENTATION

Smart softener

Foleo is the best in class softener from Pentair. This superior, plug and play, system was designed and built around the concept of a solution which performance would exceed high-end competitive products.

This softener features WiFi and Bluetooth® wireless technology connectivity to sync with the Pentair Home and Pentair Pro apps. This solution combines to power a connected water softener, which helps the homeowner take charge of their water with information at their fingertips.

DESCRIPTION

- Available in 4 different sizes: 10, 15, 20 and 28L and cover a wide range of residential applications.
- Ranging from compact apartments with a single occupant up to dwellings that can accommodate up to 8 persons.

PRODUCT FEATURES

- Up flow regeneration with blocked resin bed and variable brining regeneration
- Salt recharging intervals extended thanks to the economized brine consumption up to -50%
- Simplified and faster initial installation on the inlet and outlet pipe connections
- The ergonomic and easy to open salt lid transforms the salt recharge process from a painful operation into an easier and faster one
- The supply of brine to the system is guaranteed and eliminates the risk to have a salt bridge being slowly developed. The removable salt compartment avoids condensation to come in contact with the salt, which is the major cause of salt bridge creation. The removable salt compartment simplifies the system's cleaning process.
- Pentair Home and Pentair Pro connectivity

DIMENSIONS (WxLxH) mm:

10-15L 360 x 456 x 750

20-28L 360 x 456 x 1045
